give anything by mouth to an unconscious person.  
**Inhalation** : Move to a safe area with fresh air. Keep person warm and at rest. If not  
breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial  
respiration or oxygen by a trained person. Give nothing by mouth. If  
unconscious, place in recovery position and seek medical advice.  
**Eye Contact** : Rinse immediately with copious amounts of clean water. Seek medical help if  
symptoms persist.

## 5. FIRE-FIGHTING MEASURES

- Extinguishing Media** : Use foam, CO<sub>2</sub>, dry powders and water mist. **Do NOT** use high pressure water jets.
- Recommendations** : Decomposed products are a health hazard. Use appropriate breathing apparatus. Cool closed containers exposed to fire with foam not water jets to prevent ignition.

## 6. ACCIDENTAL RELEASE MEASURES

- Personal Precautions** : Ventilate the area. Avoid breathing in vapours. Remove all sources of ignition e.g. flames, sparks, static electricity and heat.
- Spill** : Contain and collect spillage with non-combustible absorbent material. Dispose of according to local regulations. Do not allow spillage to enter sewerage drains or watercourses.

## 7. HANDLING AND STORAGE

- Handling** : Keep container tightly closed. Keep away from heat, sparks and flame. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. After handling the material, workers should wash hands and face before eating, drinking and smoking. Always comply with health and safety regulations.
- Storage** : Store separately from any reactive substances – particularly oxidizing agents. Keep away from ignition sources. No smoking or open flames. Keep containers out of direct sunlight and keep cool.

## 8. EXPOSURE CONTROL/PERSONAL PROTECTION

- Engineering Measures** : Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapour below the OEL, suitable respiratory protection must be worn.
- Personal Protective Equipment** :
- Respiration** : Should ventilation be inadequate or if workers are exposed to concentrations above the exposure limit, appropriate certified respirators must be used.
- Eyes** : Use safety eyewear designed to protect against splash of liquids. Never touch eyes with dirty hands or gloves.
- Ingestion** : Observe the rules of hygiene. Wash hands and face before eating, drinking or smoking.
